

EUPATORIUM PLANT NAMED 'LITTLE JOE'

Abstract of the Disclosure

A new and distinct variety of *Eupatorium dubium* plant is provided that was discovered while growing among a population of seedlings in a nursery at Jennersville, Pennsylvania. A stiffer more upright and more compact growth habit is displayed. The attractive light lavender inflorescence also is more compact. Superior drought tolerance has been observed. The new variety is particularly well suited for providing attractive ornamentation in smaller landscapes and for growing in areas that experience less rainfall.
